

PRODUCT CODES/BARCODES

Documentation requirements for medicines

Consumer Unit

Mock-up should include:

- Product name
- Strength labelling
- Nordic article number
- Product code/barcode

For 2D Data Matrix, the product code must be documented by one of the following mock-up elements:

- Human readable interpretation (HRI) of product code on mock-up. For example:
«PC: 08088809095941»
- Comment field with the product code
- Internal article number that is also registered in a master data list with GTIN (and Nordic article number). This master data list must be uploaded in addition to the mock-up.

If possible, the image of the 2D Data Matrix/barcode should have sufficient resolution to allow us to scan the barcode for quality control.

Inner Pack

Mock-up should include:

- Product name
- Strength labelling
- Product code/barcode

The image of the 2D Data Matrix/barcode must have sufficient resolution to allow us to scan the barcode.
